

SHANE MILLER

Software Developer

ABOUT ME

Software development may be a recent occurrence for me, but has always been a longtime interest. I am a creator and a problem solver. Two skills that come in handy in this industry, and which really became a big draw for me to get into this field. Nothing is more satisfying to me than getting a delete button to delete what you want, instead of, you know, wiping your whole database. My original background was graphic design, but after freelancing, I found out I'd rather be the one creating the interface than designing it, and I couldn't be happier with my choice!

PROJECTS

CODE.ARCHIVE

code.Archive is a resource management tool meant to help developers keep track of information, issues, and code relating to software development.

Technologies Used: *React JS, Firebase, Semantic UI, Google Custom Search API*

 CODE-ARCHIVE.HEROKUAPP.COM

Keahua Arboretum

Our group created a terminal based program to create a animal and plant tracker for a fictional Arboretum

Technologies Used: *Python*

EDUCATION

Nashville Software School

Full-Stack Development (2019)

Radford University

Graphic Design (2013-2014)

John Tyler Community College

Fine Arts Certificate (2011-2013)

EXPERIENCE

Software Developer

Nashville Software School | 2019-2019

Nashville Software school is a full-time web development bootcamp. My focus of study included HTML, CSS, Javascript, React, Python, Django, and as well development tools. Visual Studio Code, Github, and Postman.

Group Projects

- *Nutshell with React JS:* Our team was tasked with building a lightweight Social Media application mainly using React JS. The focus was to get familiar with state and prop drilling as well as react component usage. My role was to develop the Events and News modules of the App, and assisting group members that needed assistance becoming familiar with React.
- *Welcome to Nashville:* To simulate working in a group environment, our team was tasked with building an itinerary app, based on finding activities to do in Nashville. We pulled data from 3rd party API's to let users search for local parks, concerts, events, and food. Then the user could select these activities and save them to an itinerary. HTML, CSS, and vanilla Javascript were the main languages used. My role was to work with the Nashville Parks Department API.

Associate Crew Member

Trader Joes | 2013-Present

Full time Crew members for over 5 years and still work part time purely for the love of the company

Section Leader

January 2014 - April 2019

- Section Leader for Cheese, Snacks, and Cereal. Ordered product to maintain sales. Proper order management to keep spoilage numbers low while ensuring product was kept in stock due to customer demands.
- Dynamically adjusted order numbers based on current sales trends, and need based on holidays and special events. In charge of merchandising sections to keep customer interest as well as properly grouping items together by region, product type, and current public Trends.
- Customer outreach to keep store and section "fun and interactive" with the customer.

Lead Crew Trainer

May 2018 - April 2019

- I was in charge of creating a new training program for incoming hires. I worked with a team of 3 to design and implement a training program from scratch, creating a month long training session that covered all aspects of the job and areas of the store.
- Created training guidelines for each individual section (dairy, frozen, cheese, bakery, cashier, etc) that were to be utilized for quarterly re-training of the staff.
- All section guidelines were created in a consistent and streamlined manor

Display Designer

April 2017 - April 2018

- In charge of thinking of, creating, and constructing of displayed merchandise. Had to maintain stock levels (Not to much, not to little) and make consistent theme based displays of product based on time of year and current trends.

Associate Manager

Regal Cinemas | 2008-2013

As an associate manager, I was responsible for ensuring the day to day operations of Commonwealth 20, movie theater. My main responsibilities were:

- Hiring and Training of New Hires. I was the main manager responsible for interviewing applicants and training incoming staff.
- Money Management. From day to day, I pulled cashed drawers, verified deposits and totaled end of day sales. This included daily counts of stock.
- Customer Service Relations. Customer issues and relations was a direct service provided by my position.
